Carbon Footprint

To monitor and control the emissions of the Mangaung Sun supply chain, it is important for Mangaung Sun to understand how its suppliers' activities impact the carbon footprint of Mangaung Sun.

Related to the manufacturing of goods, Bidders should provide evidence of the carbon footprint for their products, primarily regarding the production, transportation and end of life of the product.

Related to the provision of services, Bidders are required to detail the Carbon Footprint per employee, as defined by the Greenhouse Gas Protocol.

Supporting documentation, such as a Carbon Neutral Certificate, may be attached to the RFP submission in support of this.
